AMEND Senate Bill No. 221*

House Bill No. 482

by deleting the amendatory language of Section 1 in its entirety and by substituting instead the following:

68-11-276. For any patient that presents to the emergency department with an overdose of a controlled substance, the attending physician in the hospital emergency department shall be responsible for ensuring that a report of the overdose is made to the department of health. Information supplied to the department shall include the name of the patient and any necessary identifying information, and any additional information the physician deems pertinent at the time of the report. The department of health shall develop a form that can be used by hospital emergency departments to report the names of persons who present with an overdose. The department of health shall attempt to notify in a timely manner, to the extent reasonably possible, any recent prescribers of that patient that an overdose had occurred so long as the notification does not interfere with an investigation of one (1) or more of the prescribers.
